

“Analytics, Predictive Modeling, and Data Science: Hype or Holy Grail? What an aspiring actuary needs to know.”

December 8, 2015

5:30 pm

125 Hayes-Healy Center

Refreshments will be provided

Mary Jo Kannon Vice President of Data Analytics for ESIS

Mary Jo Kannon is an expert in the field of advanced analytics and its application in the global commercial insurance industry.

Most recently the VP of Data Analytics for ESIS, ACE Group's Third Party Administrator of claims services, she oversaw the overall data strategy in addition to managing the strategic outcomes and business intelligence teams. Using sophisticated tools and predictive modeling, these teams provide benchmarking and analytic services to Fortune 500 clients, including customized scorecards, benchmarking targets, and loss cost root cause analysis.

With over 25 years of commercial insurance experience, she has a broad understanding of the industry and processes that support its development, service delivery, and measurement of results. Her background includes risk management consulting, P&C actuarial pricing and reserving, data quality and operations re-engineering.

Mary Jo holds a Bachelor of Science Mathematics degree from the University of Notre Dame. She is an Associate of the Casualty Actuarial Society and was certified as a Lean Six Sigma Black Belt in 2010.
