

WE ARE MADE OF

STAR STUFF

A DIGITAL VISUALIZATION THEATER PRESENTATION

NOVEMBER 9, 2012

7:00 P.M.

JORDAN HALL OF SCIENCE, DVT

The matter that makes up our bodies was once part of a star. Keith Davis, Ph.D., will use the incredible display capabilities of the Digital Visualization Theater (DVT) to illustrate the number of stars in the universe, and how stars have slowly transformed the initial matter from the Big Bang into the elements we see in our world.

Join us for this free presentation to learn about the role of galaxies and supernovae in this incredible feat. This event is open to the public and appropriate for ages 5+, however, seating is limited.
